

Foamdoctor G2998

wetting and levelling agent

PennWhite

technical data sheet

foam control agents - general grade

Foamdoctor G2998 is a non-ionic wetting agent for use with finishing products applied to substrates that are difficult to wet.

TYPICAL PROPERTIES

Appearance:	Slightly yellow liquid
Solids:	Approximately 100%
Viscosity:	Approximately 25cP
Cloud Point:	10°C (1% in H ₂ O)

APPLICATION

Due to the non-ionic character of **Foamdoctor G2998** it can be used in conjunction with most common finishing products.

Foamdoctor G2998's marked surface-active properties mean that both polar and non-polar surfaces, for example polyethylene, polyvinylchloride and siliconised materials, can be easily wetted by aqueous systems.

The addition of Foamdoctor G2998 will reduce the surface tension of many types of organic media, improving the adhesion of polar sizing agents, adhesives or coatings.

Foamdoctor G2998 is soluble in water and all polar solvents.

PACKAGING

Foamdoctor G2998 is available in 1000kg IBC's.

SHELF LIFE AND STORAGE CONDITIONS

Keep container tightly closed. Store in a cool dry place between 5°C and 35°C. Shelf life is 12 months in unopened containers.
